SUBJECT INDEX

Adenoside monophosphate analogues
Intramolecular equilibria in metal ion complexes of artificial nucleotide analogues with antiviral properties. A case study 287

Antiviral nucleotide analogues
Intramolecular equilibria in metal ion complexes of artificial nucleotide analogues with antiviral properties. A case study 287

Biodegradation
Biophysical Investigation of Bacterial Aromatic Extradiol Dioxygenases Involved in Biodegradation Processes 321
Biomimetic oxidation catalysts
Zeolite-encapsulated and clay-intercalated metal porphyrin, phthalocyanine and Schiff-base complexes as models for biomimetic oxidation catalysts: an overview 39

Catalysis
The roles of Na^+ and K^+ in pyridoxal phosphate enzyme catalysis 147
Clays
Zeolite-encapsulated and clay-intercalated metal porphyrin, phthalocyanine and Schiff-base complexes as models for biomimetic oxidation catalysts: an overview 39

Electron delocalization
Orbital interactions, electron delocalization and spin coupling in iron–sulfur clusters 199
Electronic structure
Magnetic circular dichroism spectroscopy as a probe of the geometric and electronic structure of non-heme ferrous enzymes 369
Enzymes
The roles of Na^+ and K^+ in pyridoxal phosphate enzyme catalysis 147
Extradiol cleaving dioxygenases
Biophysical Investigation of Bacterial Aromatic Extradiol Dioxygenases Involved in Biodegradation Processes 321

Ferritin
Molecular aspects of iron uptake and storage in ferritin 347

Geometric structure
Magnetic circular dichroism spectroscopy as a probe of the geometric and electronic structure of non-heme ferrous enzymes 369

Intradiol cleaving dioxygenases
Biophysical Investigation of Bacterial Aromatic Extradiol Dioxygenases Involved in Biodegradation Processes 321

Intramolecular equilibria
Intramolecular equilibria in metal ion complexes of artificial nucleotide analogues with antiviral properties. A case study 287
Iron-sulfur clusters
Orbital interactions, electron delocalization and spin coupling in iron–sulfur clusters 199
Iron storage
Molecular aspects of iron uptake and storage in ferritin 347
Iron uptake
Molecular aspects of iron uptake and storage in ferritin 347

K^+
The roles of Na^+ and K^+ in pyridoxal phosphate enzyme catalysis 147

Magnetic circular dichroism spectroscopy
Magnetic circular dichroism spectroscopy as a probe of the geometric and electronic structure of non-heme ferrous enzymes 369
Metal binding
Metallothioneins 461
Metallothioneins
Metallothioneins 461
Metal–metal distances
XAFS of dinuclear metal sites in proteins and model compounds 245
Metal ion complexes
Intramolecular equilibria in metal ion complexes of artificial nucleotide analogues with antiviral properties. A case study 287
Multi-nuclear proteins
XAFS of dinuclear metal sites in proteins and model compounds 245

Na^+
The roles of Na^+ and K^+ in pyridoxal phosphate enzyme catalysis 147
NH_4^+
The roles of Na^+ and K^+ in pyridoxal phosphate enzyme catalysis 147
Nitrogen
Nitrogen fixation in solution 69
Nitrogenase
Nitrogen fixation in solution 69
Non-heme ferrous enzymes
Magnetic circular dichroism spectroscopy as a probe of the geometric and electronic structure of non-heme ferrous enzymes 369
Nucleotide complexes
Intramolecular equilibria in metal ion complexes of artificial nucleotide analogues with antiviral properties. A case study 287

Orbital interactions
Orbital interactions, electron delocalization and spin coupling in iron–sulfur clusters 199
Oxomanganese clusters
High-valent oxomanganese clusters: structural and mechanistic work relevant to the oxygen-evolving center in photosystem II 1

Photosystem II
High-valent oxomanganese clusters: structural and mechanistic work relevant to the oxygen-evolving center in photosystem II 1
Phthalocyanines
Zeolite-encapsulated and clay-intercalated metal porphyrin, phthalocyanine and Schiff-base complexes as models for biomimetic oxidation catalysts: an overview 39
Porphyrins
Zeolite-encapsulated and clay-intercalated metal porphyrin, phthalocyanine and Schiff-base complexes as models for biomimetic oxidation catalysts: an overview 39
Protein
Metallothioneins 461

Reduction
Nitrogen fixation in solution 69

Schiff bases
Zeolite-encapsulated and clay-intercalated metal porphyrin, phthalocyanine and Schiff-base complexes as models for biomimetic oxidation catalysts: an overview 39
Spectroscopic properties
Metallothioneins, 461
Spin coupling
Orbital interactions, electron delocalization and spin coupling in iron–sulfur clusters 199

Water oxidation
High-valent oxomanganese clusters: structural and mechanistic work relevant to the oxygen-evolving center in photosystem II 1

XAFS, Circular dichroism
Metallothioneins, 461
X-ray absorption fine structure spectroscopy
Orbital interactions, electron delocalization and spin coupling in iron–sulfur clusters 199

Zeolites
Zeolite-encapsulated and clay-intercalated metal porphyrin, phthalocyanine and Schiff-base complexes as models for biomimetic oxidation catalysts: an overview 39
